One-piece Steel MC Cable Hangers

Mount in any direction, on variety of surfaces • Meets 2008 NEC

Arlington's steel MC cable hangers meet the **NEW REQUIREMENTS** of NEC 300.4(e)... for installing MC or AC metal jacketed cables under corrugated metal roof decking.

The outer surface of cable must be 1-1/2" from the underside of the decking. **Our SMC hangers exceed this requirement!**

Hang Flex, MC, AC, and HCF cables any which way with our one-piece galvanized SMC series steel cable hangers! They mount on a variety of surfaces, in any direction.

Available in three styles, our SMC hangers are listed to support and secure 14/2 to 10/4 cables – as required by NEC 2008 330-30.

They are the best and most economical hangers in the industry that meet the new requirements for NEC 300.4(E), specifically the installation of flexible metal jacketed cable under corrugated metal roof decking.

The outer surface of cables other than rigid and IMC must now be at least 1-1/2" (38 mm) from the surface of the roof decking. *Our SMC hangers exceed this requirement, keeping cable away from the surface by more than 2".*

SMC8 holds up to eight cables. **SMC4** holds up to four. **SMC4F** mounts flat, holding up to four cables *on one side* of the hanger.

- Cost less than cable tray
- Secure installation with a screw driver
- Mount in any direction

SMC Series One-piece Steel Cable Hangers

Meets new requirement of NEC 300.4(E) for all metal cable systems

SMC8, SMC4, SMC4F

- Secure cables independently without bundling
- Attach with beam clamp, threaded rod or screws
- Meet NEC 2008 paragraphs 300.4(E), 320.30, 320.30(A), 330.30, 330.30(C), 348.30(A) and 348.30(B)

Save money! Use our SMC steel hangers in place of cable tray for a cost-effective installation.

Install with a screwdriver by bending a tab over the cable to lock it firmly in place.

SMC4, SMC4F and SMC8 screw-mount on metal or wood studs...

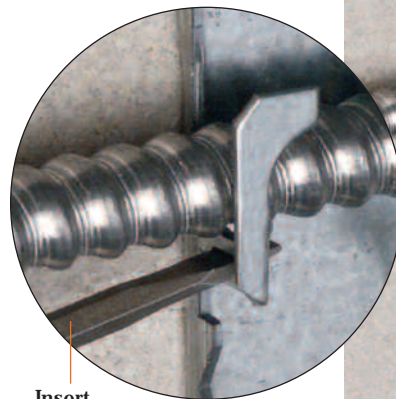

... on concrete block walls...

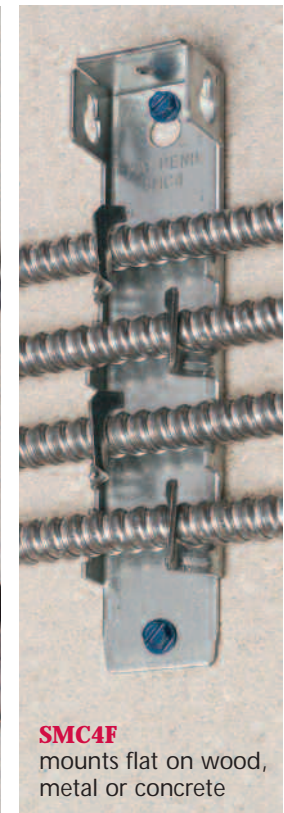

or ceilings!

- One-piece design
- UL and CSA Listed
- Competitively priced
- For 3/8" flex and 14/2 to 10/4 metal jacketed cables

Insert screwdriver through slot

Bend tab over cable to lock it securely in place

SMC4F mounts flat on wood, metal or concrete

Supports and secures up to eight 3/8" flex and/or 14/2 to 10/4 metal jacketed cables per NEC 2008
